

Precision Pneumatics Ltd.

Precision Pneumatics are specialists in all aspects of industrial automation supply and support. From our extensive background in pneumatics, especially our status as Festo Premier Stockist's we can support all your Pneumatic and Automation requirements.

Our Engineering Solutions and Services catalogue offers an extensive range of products from major manufacturer's including PIAB.

PIAB are global leaders in industrial vacuum technology and provide innovative solutions that will improve energy efficiency, productivity and working environments.

PIAB manufacture and develop vacuum pumps, vacuum accessories and suction cups.

A completely new dimension in vacuum technology PIAB use coax in many of their products & solutions. It ensures excellent performance at low & high speed pressures and is ideal in solutions where compressed air lines deliver air at low or fluctuating pressure.

Some advantages of PIAB pumps based on Coax

- High efficiency
- Low energy consumption
- Simple to install
- Low noise level
- Easy to clean
