

FO-500 Ultra Low Volume Fogger

Use the FO-500 for disinfection, pest control, odour control and plant protection.

The FO-500 works by expelling a fine, almost invisible mist into the atmosphere which eventually settles on all surfaces including those impossible to reach by conventional methods.

The machine is compact, lightweight and robust, making it ideal for commercial use, whilst equally suited to a domestic environment. The large 5 litre tank and powerful 1400w 240v electric motor allow the covering of large areas with ease.

The ability to adjust the fogger output from a vapour of just 9 μm up to a fog 49 μm , and flow rate up to 49 litres per hour makes this machine suitable for the application of disinfectants, biocides, fungicides and pesticides.

Regular fogging with a Defra approved disinfectant such as Steri 7 or Safe4 will help prevent the cross-infection of viruses such as MRSA, Coronavirus (human and feline), Strangles, Ringworm and many more.

WHERE CAN I USE IT?

Use the FO-500 ULV Cold fogger in hospitals, schools, homes, restaurants, holiday sites, food places, dairy farms, poultry yards, warehouses, barns, greenhouses etc.

Specifications	
Motor	1400w, 220v AC, 50hz
Tank Capacity	5 Litre
Output Flow Rate	0-49 l/h
Droplet Size	9-49 micron
Empty Weight	5.3 kg
Dimensions	50 x 17 x50 cm
